JAPAN WASTE LAW | JAPAN WASTE MANAGEMENT AND PUBLIC CLEANSING ACT

Japan Hazardous IW/SCIW Waste Awareness

COURSE	LENGTH	HOURS
Course	2 days	16 hours

ABOUT THIS COURSE

This course covers the responsibilities of waste generators and transport and disposal firms under Japan's Waste Management and Public Cleansing Act, with special emphasis on outsourcing the treatment of hazardous wastes. It also covers Specially Controlled Industrial Waste (SCIW), PCB waste, PFOS, and the records each generator must keep to comply with Japanese waste laws.

MAIN FOCUS OF STUDY

1. **Waste classification and waste & recycling related laws**
2. **Generator and government responsibilities; waste treatment plans**
3. **Outsourcing of waste treatment; treatment standards and permits**
4. **Import and export of wastes; administrative penalties**
5. **Specially Controlled Industrial Waste (SCIW) and the SCIW manager**
6. **Treatment/disposal subcontracts and the manifest system**
7. **Ledgers, disposal records, and government procedures**
8. **PCB waste: storage, transport, and disposal through JESCO**
9. **PFOS: uses, related laws, storage, labeling, transport, and disposal**
